## NEW PRODUCT RELEASE HUB CAP KIT FOR MH SERIES WHEELS

MATCO mfg announced the availability of a hub cap kit for the MH series wheels today. Responding to customer inquiries for a kit to allow installation of the current WHLWC wheel cover on MH series wheels, MATCO mfg has introduced the MHWC hub cap kit.

The kit includes wheel covers and mounting hardware for two wheels. The WHLWC wheel covers are made from durable ABS polymer. The wheel covers can be painted to match customer requirements. Installation of the kit can be accomplished without removing the wheel. Installation on MH wheels using CNC spun wheel halves (introduced in early 2001) can be accomplished in about 10 minutes. On earlier MH series wheels using stamped wheel halves, some trimming of the wheel cover may be required and installation may require about 30 minutes.

Questions regarding this release can be referred to the technical support department of MATCO mfg at 2361 S. 1560 West, Woods Cross, UT 84087, by email to [tech@matcoals.com](mailto:tech@matcoals.com) or by telephoning (801) 335-0582.
